... NT's security event log and Local Security Authority (LSA).

In a Windows NT security **policy** where an account **lockout** is enabled after a predetermined number of bad login attempts, an event log notice is...

...which the bad login sequence took place. The lsa2 hotfix makes sure that an account **lockout** notice would also be generated in the event log of the Primary Domain **Controller** (PDC) to which the offending workstation authenticates.

Microsoft also acknowledged that administrators could exploit APIs...
